The lake level at Canada Lake is now at summer level and the level at Stewerts Landing Dam is 0.48" below summer level										
The weather forecast for the next week shows only light rain and the water entering the lake is at a light amount.										
I suggest the bottom gate at the dam be closed and the flash boards at the top of the dam be the device which regulates the										
the water level. The leaks the top gate should be more than enough for the fish. fish if the water level falls below the top of the flash										
boards
