4/28/26	7am	1541.85		0	-1.25	-15			1.5	1	Canada Lake came up .4 inches in the past 24 hours. Tomorrow Canada lake may remain at the same level or be lower. Suggest the dam be closed to the same flow coming into the lake from Irving pond at the bridge on 29A or less. If the person closed the dam at Stewarts Landing to the minimum amount needed downstream of the dam this would be great. Closing the dam to the reading on the gate gauge is not the best way to get the best flow rate downstream Looking at the downstream flow downstream is the best way.

4/30/26	7am	1542.1		1.35	-1	-12			2.5	0.75	Canada Lake came up 2.6 inches in the past 24 hours. I took a trip to the dam yesterday and from the amount of water flowing under the bottom gate the gate is open 1/2-3/4 inches. I feel this opening is supplying the minimum flow to satisfy downstream needs.
